

USMAN ANWAR

FULL STACK SOFTWARE ENGINEER | AI-ASSISTED DEVELOPMENT

+92 3710571295 usmanali22181@gmail.com Lahore, Pakistan
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

MERN Stack Developer and Full Stack Software Engineer with 3+ years of combined professional and project-based experience developing responsive, scalable, database-driven web applications. Strong experience with React.js, JavaScript, TypeScript, Next.js, Node.js, Express.js, RESTful APIs, MongoDB, MySQL, SQL, authentication, API integration, responsive web design, debugging, testing, deployment, and performance optimization. Experienced across the Software Development Lifecycle (SDLC), Agile development, Git/GitHub workflows, CI/CD pipelines, cross-browser compatibility, and technical documentation. Hands-on experience with Generative AI and AI-assisted software development using ChatGPT, GitHub Copilot, Claude, and Gemini for prompt engineering, requirement analysis, code generation support, debugging, refactoring, code review, test-case planning, documentation, and AI API integration.

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), TypeScript, Next.js, Angular, Redux, React Query, HTML5, CSS3, Tailwind CSS, Bootstrap, Webpack, responsive web design

Backend & APIs: Node.js, Express.js, RESTful APIs, REST API development, authentication, authorization concepts, middleware, server-side routing, API integration, CRUD operations

Databases: MongoDB, MySQL, SQL, database-driven applications, data modeling fundamentals, query handling, DB Visualizer

Testing & Engineering: Debugging, testing, test-case planning, performance optimization, cross-browser compatibility, accessibility (WCAG 2.2), reusable components, maintainable code, requirement analysis

DevOps & Tools: Git, GitHub, npm, Vercel, CI/CD pipelines, deployment workflows, Azure DevOps, Jira, VS Code, Visual Studio, browser developer tools

Methodologies: Agile Development, Software Development Lifecycle (SDLC), team collaboration, technical documentation, remote collaboration

AI & Generative AI: Generative AI, ChatGPT, GitHub Copilot, Claude, Gemini, prompt engineering, AI-assisted coding, code generation support, debugging, refactoring, code review, test-case planning, requirement analysis, documentation support, AI API integration

PROFESSIONAL EXPERIENCE

MERN Stack Developer | BusinessGenie

Lahore, Pakistan | Jan 2026 - Present

- Develop and maintain responsive, scalable web applications using React.js, TypeScript, JavaScript, Node.js, Express.js, RESTful APIs, and database integrations.
- Build reusable components, landing pages, dashboards, forms, authentication-oriented workflows, and API-connected interfaces for desktop, tablet, and mobile devices.
- Translate business requirements into maintainable frontend and backend solutions with structured data flows, REST API integration, CRUD operations, and database-driven functionality.
- Apply AI-assisted software engineering for requirement analysis, prompt engineering, component planning, debugging, refactoring, code review support, test-case planning, and technical documentation.
- Support software quality through testing, accessibility checks, cross-browser compatibility, performance optimization, defect resolution, Git/GitHub workflows, deployment, and CI/CD practices.

MERN Stack Developer | House of Perfection

Lahore, Pakistan | Feb 2025 - Aug 2025

- Engineered responsive and reusable React-based interface components for desktop, tablet, and mobile web applications.
- Implemented navigation systems, search experiences, interactive cards, forms, validations, and dynamic user interface behavior.
- Integrated React interfaces with Node.js and Express.js backend services and RESTful APIs for reliable client-server data exchange.
- Applied MySQL, MongoDB, SQL, CRUD operations, data validation, and database-backed workflows in full-stack application features.
- Debugged layout, usability, application, and data-flow issues while supporting testing, documentation, maintainable code, and iterative delivery.

Web Developer | GrowBusinessDigital / Independent Projects

Remote / Lahore | 2024

- Built client-focused full-stack and frontend web applications using React.js, Next.js, JavaScript, Node.js, Express.js, REST APIs, HTML5, CSS3, and modern CSS frameworks.
- Developed authentication flows, user-management interfaces, responsive content sections, reusable components, and business workflow features.
- Managed Git/GitHub source control, deployment preparation, code organization, debugging, and iterative application enhancements.
- Maintained deployed project demonstrations showcasing responsive frontend engineering, API integration, database operations, and full-stack problem solving.

Sales & Marketing Executive | 3-Month Experience

Lahore, Pakistan | 2024

- Managed client outreach, lead generation, follow-ups, and customer communication for sales and marketing activities.
- Presented services to prospective clients, handled inquiries, and supported lead conversion and relationship management.
- Assisted with promotional activities and business development while maintaining professional communication with clients.

SELECTED PROJECTS

BusinessGenie Consulting Website | *React.js, TypeScript/JavaScript, Responsive UI*

- Contributed to a corporate consulting platform covering ERP implementation, HRMS automation, digital marketing, SEO, and web development services.
- Developed reusable responsive content modules and service journeys supporting clear navigation, maintainability, and international business presentation.

CRM System | *React.js, Node.js, Express.js, MySQL/MongoDB, REST APIs*

- Developed CRM workflows for user management, organized records, form handling, authentication practice, CRUD operations, and database-connected business processes.
- Implemented RESTful client-server communication, API integration, data validation, and database-driven application functionality.

StyleShop Express | *React.js, JavaScript, E-commerce UI*

- Created a responsive e-commerce interface with reusable product components, intuitive browsing patterns, interactive experiences, and mobile-friendly behavior.
- Organized maintainable frontend sections and deployment workflows using Vercel.

Business Transformation Hub | *React.js, TypeScript, Tailwind CSS*

- Built a professional responsive website using reusable components, modular sections, scalable component organization, and modern frontend architecture.
- Applied cross-browser compatibility and responsive testing across common devices.

AI-Assisted Engineering Workflow | *ChatGPT, GitHub Copilot, Claude, Gemini, Generative AI*

- Use Generative AI tools for prompt engineering, requirement analysis, component planning, code generation support, debugging, refactoring, code review, test-case planning, and technical documentation.
- Review AI-generated recommendations before implementation to maintain code quality, relevance, maintainability, and technical accuracy.

Developer Portfolio | *React.js, JavaScript, Responsive Design*

- Built a recruiter- and client-focused portfolio showcasing deployed applications, technical skills, responsive web development, and project information.

EDUCATION

Bachelor of Science in Information Technology (BSIT) - In Progress | Virtual University of Pakistan | Lahore, Pakistan

Relevant focus: information technology, programming, software development, databases, web technologies, and computing fundamentals.

Intermediate in Computer Science (ICS) | Commerce College, Kamalia | 2022 - 2024

Programming fundamentals, computer concepts, and foundational principles of software development.

LANGUAGES & PROFESSIONAL ATTRIBUTES

Urdu: Native | Punjabi: Native | English: Basic Working Proficiency

Problem Solving | Requirement Analysis | Team Collaboration | Continuous Learning | Delivery Ownership | Remote Collaboration
