PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with 4+ years of hands-on experience building responsive, user-friendly, and database-driven web applications. Skilled in React.js, JavaScript, HTML5, CSS3, Bootstrap, Node.js, Express.js, MySQL, MongoDB, REST APIs, authentication, API integration, and AI-assisted development workflows. Experienced in developing CRM-style applications, reusable frontend sections, modern layouts, form handling, and API-connected interfaces. Strong focus on clean code, debugging, teamwork, cross-device testing, and continuous improvement.

TECHNICAL SKILLS

- Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap, responsive UI development, reusable components, forms, cards, search bars, navigation bars, and interactive sections
- Backend: Node.js, Express.js, REST APIs, authentication flows, server-side routing, API integration, and middleware basics
- Databases: MySQL, MongoDB, CRUD operations, data handling, and database-driven interfaces
- AI & Productivity: AI-assisted coding, prompt-based debugging, ChatGPT and GitHub Copilot workflows, AI API integration basics, code explanation, and technical documentation support
- Tools: GitHub, VS Code, Figma, npm, browser developer tools, and deployment workflows
- Core Strengths: Problem solving, teamwork, debugging, cross-device testing, clean layouts, and user-friendly interface development

WORK EXPERIENCE

MERN Stack Developer | House of Perfection | Lahore, Pakistan

- Designed and developed responsive web pages and modern UI sections for desktop, tablet, and mobile users.
- Built reusable frontend components including navigation bars, cards, forms, search bars, hover effects, and interactive UI sections.
- Improved layout structure, spacing, responsiveness, and user flow to deliver cleaner and more user-friendly websites.
- Worked with React.js, HTML5, CSS3, JavaScript, Bootstrap, Node.js, Express.js, MySQL, and MongoDB on practical development tasks.
- Implemented form handling, frontend validations, and API-connected interfaces for smoother data collection workflows.
- Used AI-assisted development tools for debugging support, component planning, code explanation, and documentation improvement.
- Collaborated with team members to understand requirements, resolve UI issues, test pages, and deliver updates on time.

Web Developer | BusinessGenie | Lahore, Pakistan | January - Present

- Working on responsive business websites and modern web interfaces using React.js, JavaScript, HTML5, CSS3, Bootstrap, Node.js, and Express.js.
- Developing reusable UI sections, landing pages, forms, dashboards, and API-connected screens according to project requirements.
- Collaborating on frontend updates, bug fixing, responsive testing, layout improvements, and AI-assisted workflow documentation.

Web Developer | GrowBusinessDigital / Portfolio Projects | Lahore | 2024

- Developed MERN stack projects covering React components, backend APIs, authentication, and database operations.
- Created portfolio-ready projects with responsive interfaces, structured content sections, user management screens, and clean navigation.
- Connected frontend screens with Node.js and Express.js APIs for smooth client-server communication and data handling.
- Worked with MySQL and MongoDB for CRUD workflows, data storage, retrieval, and database-driven UI features.

- Used GitHub for version control, code organization, deployment preparation, debugging, and project improvement.
- Maintained a professional portfolio with project demos and development work available at usman-anwar.vercel.app.

PROJECTS

Developer Portfolio | React.js, JavaScript, Responsive UI | Live Portfolio

- Built and maintained a professional portfolio website to showcase MERN stack projects, frontend work, and development skills.
- Presented projects through responsive sections, project details, and easy navigation for recruiters and clients.
- Used the portfolio as a central project hub instead of listing separate demo links in the CV.

CRM System | React.js, Node.js, Express.js, Database Integration | Portfolio Project

- Developed a functional CRM-style system with a responsive user interface and organized workflow screens.
- Implemented user management and data-handling features to support better business process organization.
- Connected frontend screens with backend APIs for smooth communication between client and server.
- Focused on clean UI structure, responsive design, reusable components, and practical business functionality.

AI-Assisted Development Workflow | ChatGPT, GitHub Copilot, Prompt Engineering | Productivity Practice

- Used AI tools to understand requirements faster, plan reusable components, improve code readability, and speed up debugging.
- Applied prompt-based troubleshooting for frontend layout issues, API errors, and cleaner documentation.
- Reviewed AI-generated suggestions manually to ensure code quality, project relevance, and reliable implementation.

Responsive Website Components | HTML5, CSS3, JavaScript, Bootstrap, React.js | Practice Work

- Built modern website sections such as headers, cards, forms, buttons, search bars, and interactive UI elements.
- Used Bootstrap and custom CSS to create mobile-friendly layouts with consistent spacing and visual hierarchy.
- Added JavaScript interactions and hover effects to improve usability and user engagement.

Authentication and API Practice | Node.js, Express.js, REST APIs, MySQL / MongoDB | Practice Work

- Practiced authentication workflows, route handling, API structure, and backend logic using Node.js and Express.js.
- Worked with MySQL and MongoDB for database operations including data storage, retrieval, and basic CRUD features.
- Tested API responses and connected backend functionality with frontend screens for a complete MERN stack flow.

EDUCATION

ICS | Commerce College, Kamalia | Kamalia, Pakistan | 2022 - 2024

- Completed Intermediate in Computer Science with a focus on programming fundamentals and computer concepts.

LANGUAGES

Urdu: Native | Punjabi: Native | English: Basic

ADDITIONAL INFORMATION

- Available for MERN Stack Developer, React Developer, Frontend Developer, and Junior Full Stack Developer roles.
- Comfortable learning new tools, improving code quality, following feedback, and collaborating on day-to-day development tasks.
- Open to using AI productivity tools responsibly for faster debugging, cleaner documentation, and better development workflows.
- References available upon request.
